

# PC Security Shield

## Necessary steps:

1. Buying the service from the service provider and thus receiving the subscription number
2. Downloading and installing software

## Buying the service

PC Security Shield can be purchased by accessing and logging on to <http://www.in2biz.in>. When subscribing to the service you must select the payment plan and number of licenses to be included in your subscription. After specifying this information and completing the payment, you will receive a subscription number for the client installation together with the download link for the software and portal access information.

## Getting started

When purchasing the service from <http://www.in2biz.in> you will receive the subscription number that is needed for the software installation together with instructions how to log into the portal. One subscription number enables you to do as many installations as you have specified as your license size. All installations & licenses can be managed using the Management Portal.

The first step in taking the PC Security Shield into use is installing the client software.

## Client software installation

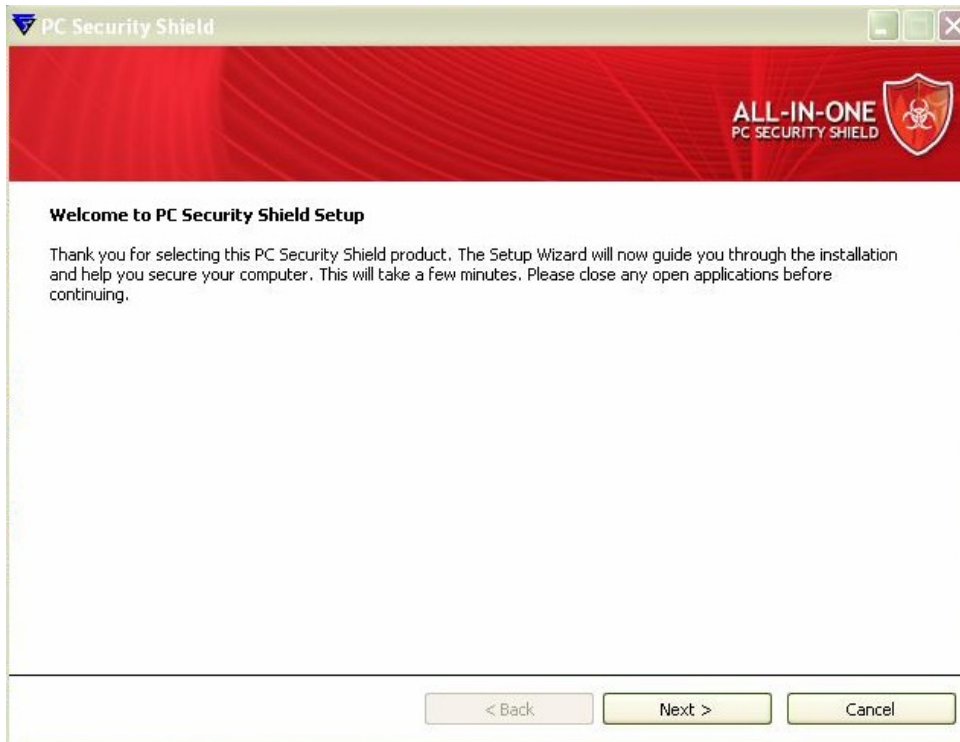

PC Security Shield's client software is available for your installation on <http://www.in2biz.in>

## Recommended system requirements

- **Operating System:** Windows 2000-SP4 / XP / Vista 32-bit
- **Processor:** Windows 2000 / XP Intel Pentium III 1GHz or higher, Windows Vista 2GHz or higher

## Step 1: Client Installation – Click Next

## Step 2: Client Installation – Accept Agreement

### Step 3: Client Installation – Enter Subscription key / License Key

The screenshot shows a window titled "PC Security Shield" with a red header bar containing the "ALL-IN-ONE PC SECURITY SHIELD" logo and a biohazard icon. The main content area is white and contains the following text:

**Subscription key**  
Please enter your subscription key below.

My subscription key is:

QOQK 6NLC QYFJ 9UNB GYQD

At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel".

### Step 4: Client Installation – Check system requirements

The screenshot shows a window titled "PC Security Shield" with a red header bar containing the "ALL-IN-ONE PC SECURITY SHIELD" logo and a biohazard icon. The main content area is white and contains the following text:

**System Requirements**

**i** Setup has detected that your computer does not meet the [recommended hardware requirements](#). This does not prevent you from installing the software, but your system may become slower.

To improve performance, we recommend that you:

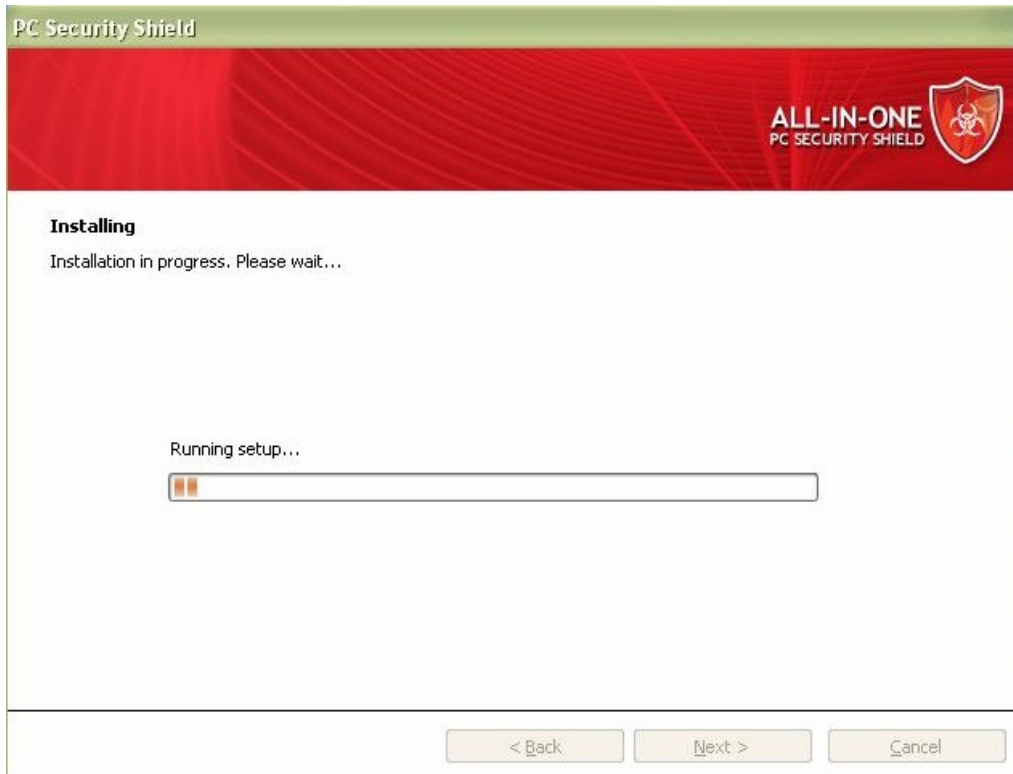

- Select the Performance-optimized security level. [More info.](#)
- Turn off Spam Control

At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel".

## Step 5: Client Installation – Confirm Installation folder

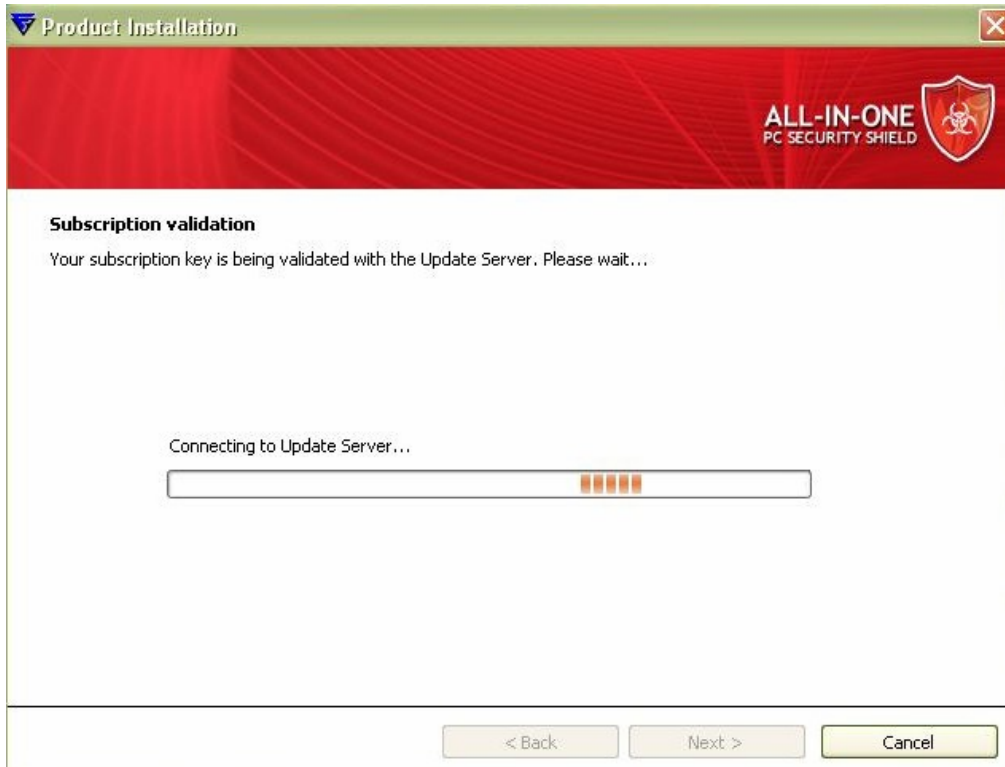

## Step 6: Client Installation – Installation

## Step 7: Client Installation – Restart to complete installation

## Step 8: Client Installation – Subscription validation

## Step 9: Client Installation – Successful Registration

## Step 10: Client Installation – Client
